

Student Cafeteria Accounts

Individual cafeteria accounts are assigned to each student for accounting purposes for the purchase of meals served in school cafeterias. Our food service utilizes the PrimeroEdge system for managing student accounts. Procedures for purchasing and collecting money for individual student accounts are in place that ensure that the identity of each student and their information is protected. Students may not use another student's account to purchase a meal or a la carte items.

Iroquois Elementary School - Elementary students may deposit money into their meal accounts at any time. All students have an account, which can be accessed by providing the food service cashier with their name. Please review the guidelines listed below:

- Students may pay on their account at any time;
- If a student has charges, the system will pay off these charges first and then give the student credits (if the student has money left over);
- Students may not "charge" snack items. Money for a la carte items must be available in their cafeteria account.

Iroquois High School - Junior and Senior High students may deposit money in advance for a la carte items. In order to activate a high school student account, each student has a 8-digit school ID number at the cashier checkout line. The student will enter his/her number on a keypad, which then brings up their individual account.

With the PrimeroEdge system, parents/guardians will have access to their child's account information, including account balances and purchases, make secure online payments at any time at www.schoolcafe.com.

- Set up hassle-free automatic payments for each student.
- Receive low balance email messages.
